DISASTERLAN Incident: DisasterLAN Version 8.0 Incident Elapsed: 4D 02h 43m 31s Tue Jun 07, 2011 14:31:33	
Incident Messages	
6/7/2011 13:46:24 STATE OF EMERGENCY The National Weather Service in Buffalo is reporting that a high pressure system is entering the region. Thunderstorms, high winds, and heavy rains are expected throughout most of the Western New York region starting at 16:00 EST. Note: High winds and Heavy rains are expected to hamper rescue efforts and make it difficult to setup temporary tent-based shelters. Those sheltering in tents should begin moving to sturdier structures over the next few hours prior to the storm hitting.	Buffalo Snow Storm - 1 
6/7/2011 13:46:02 Help Hotline Due to the damage in Niagara County, the Erie County Emergency Operations Center is being utilized as the central EOC for operations, planning, and logistics. Additionally a triage center has been setup at the Main Street Armory in Buffalo to coincide with a shelter located at the Main Place Mall. EOC Hotline: 716-822-8668 Armory Triage Number: 716-316-0924 Main Place Shelter Number: 716-491-7162	6/7/2011 13:45:59 Erie County EOC activated at 1700 An earthquake measuring 7.1 on the Richter scale was detected along the Niagara Fault line in Western New York. With an epicenter 5 miles east of Niagara Falls, massive amounts of damage occurred in both the Canadian and American sides of the gorge. Casualties numbers at this time are unknown, but are being estimated at 35,000 possible deaths due to the severe nature and location of the infrastructure damage.
Press Briefings & Meetings	
6/7/2011 13:45:06 Mayor's Briefing A briefing with the Mayor will be held tomorrow at 2:00EST.	
...IT'S EXPECTED TO BE CLOSED FOR ANOTHER FULL WEEK! • THE LEFT LANE OF THE 290 WEST IS SLOW ABOUT A MILE BEFORE THE 190 SOUTH RA	

DisasterLAN's Status Board module provides an electronic screen that is divided into several sections to present a variety of information in individual frames. Since DisasterLAN is web-based, status boards are accessible by people within and outside the EOC. Status Boards help maintain a common operational picture and reduce calls into the EOC to obtain information from field units and emergency partner organizations. Status Board can be displayed on an individual EOC staffer's PC monitor or on a projector or large screen LCD TV. Status Board operators can post photos and PDFs from the Incident Folders module to the Status Board Slide Show with one click of a button. Administrators can generate snapshot reports of Status Board content including historical states and changes.
