

# Higher Education

## Our Knowledge is Institutional

BCG has been supporting Incident Management Responses, Exercises, Trainings, Custom Engineering needs, and on-site EOC Staffing since 2004.

- **Campus Safety & Emergencies**
- **Game Day & Mass Gatherings**
- **Daily Operations**
- **Drills & Exercises**

### Campus Safety & Emergencies

Integrating our IMS into your daily operations will help keep your team prepared. Scenario based notification templates and **ticketing tools** help you alert your staff and activate an appropriate emergency response plan with just the click of a button. Oversee on- and-off campus student population and those studying abroad.

Staff Positions	Operational Period Staff	Prepared / Approved By
Planning Section Chief	Jayden Jones	
Incident Commander	Michael Ward	Michael Ward
Resources Unit	Ava Thompson	
Communications Unit	Kelly Quin	
Medical Unit Leader	Allen Awad	
Safety Officer	David Katz	

### Game Day & Mass Gatherings

DLAN also includes everything you need to manage special and routine events, academic events, athletic events, guest speaker and VIP engagements, commencements, and other mass gatherings. DLAN is used extensively to manage operations for home football games.

**Don't invest in a one-off. Invest in a system that's by your side every day.**

Our Incident Management Software (IMS) has been utilized by higher education institutions to improve public safety, run special events, and facilitate day-to-day operations. DLAN includes tools for routine task management, event monitoring, secure incident notifications, mobile reporting tools, and provides enhanced communication for multi-agency/department responses.

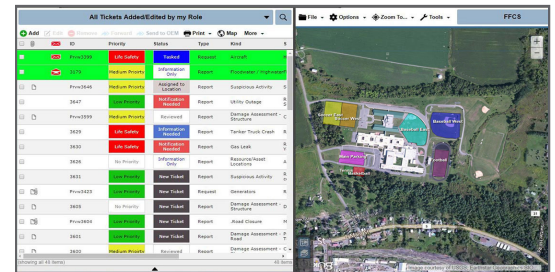

## Daily Operations

Our software provides tools for **daily operations**, such as campus patrol, routine alerting, community briefings, facility and hazmat management, maintenance, inspections, compliance reporting, easy personnel tracking utilizing the mobile app, and vaccination clinics. DLAN helps executives quickly see how tasks are progressing with customizable reporting tools and color-coded statuses and priorities.

## Drills & Exercises

Build and conduct your own exercises & scenarios with your DLAN system. Exercise and evaluate your campus operation center, multiple operation centers, or drill specific positions within sections or units of the various OP centers. If desired, BCG personnel can design, deliver, and be present on-site to support everything from small seminars to tabletop and large full-scale exercises.

## Plus EM Curriculum & Instruction

Why not make your DLAN system work double duty and offer students real-life experience with the Incident Management System used by your institution? Provide next-level instruction to the future Emergency Managers in the curriculum by exposing them to cutting edge Incident Command System (ICS) technology, complete with time-based exercise injects, roles, dashboards, and after action reporting.
