

The Challenge

At the New York State Emergency Managers Association (NYSEMA) Conference this year, NYS DHSES Commissioner Jackie Bray called attention to the fact that there are fewer and fewer blue-sky days, urging Emergency Managers to think about what they need at the county level to handle this. State leadership believes that NYS Emergency Management personnel will need to *"become experts in Communication"*.

The BCG Solution

BCG is your emergency management partner; our experience shows that frequent touchpoints throughout the year help our customers maximize the value of their DLAN EOC software system. BCG's consultation helps you make the most of your existing DLAN investment. We have the subject matter experts to identify challenges, discover solutions, and acquire funding to help you fulfill the Commissioner's initiative by scoping the approach needed for an effective day-to-day All-Hazards package.

Workflow Analysis with BCG

1 Evaluate Your Operations

Our team will serve as your dedicated consultants and project managers, working closely with you to identify absolute must-have features.

4 Enjoy Enhanced Communication

Your organization's critical tools, workflows and processes are now optimized to manage the actively changing emergency management and response landscape for more effective communications.

2 Configure to Your Workflow

BCG will not rip-and-replace your workflow, but instead work with you to configure the system to match your existing policies and procedures.

3 Training and Exercise

A DLAN County, City, or Agency can create and manage its own local training and exercises to prepare for and support regional and local incidents.

Identify, adapt & implement new tech with BCG today!
