Sheltering Toolkit

DLAN

The BCG DLAN Sheltering Toolkit provides situational awareness through dashboards, forms, installation, and the training required to manage all sheltering operations

Manage Shelters in Real Time

DLAN subject matter experts have built a toolset of Shelter Status forms and Shelter Status dashboards that new and existing customers can utilize to quickly communicate the status of regional shelters. Planning staff in charge of situational awareness can easily track and communicate total shelter capacity, current capacity, number of staff, shelter location, shelter status, and different capabilities including their support for air conditioning, pets, handicapped accessibility, medical staff, and more. Color coded statuses within the Shelter forms allow users to identify Shelter status at a glance.

Plug & Play - Sheltering Operations at-a-glance

BCG has crafted a sheltering toolkit that provides the most rapid, and accurate operational picture available.

Select
Select individual or multiple shelters and the data tickers populate for a clear summary of the selection(s).

Track
Track shelter status and population, pets, staff levels, and tasks like obtaining food, bedding, and security.
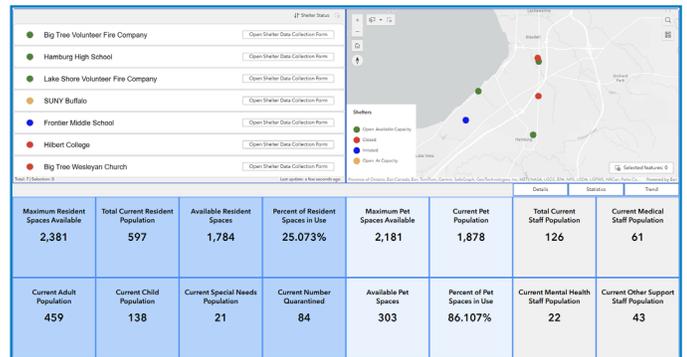

Manage
Manage counts & color-coded statuses of your shelters, along with accurate updates to shelters maintained by the American Red Cross.

Filter & Report
Filter By Incident, Shelter(s), & Data Range. View detailed individual shelter assessments, vital statistics, and even trends.

Customize
BCG can tailor the Sheltering Toolkit, reporting forms, trends, impacts, and iconography to meet your organization's needs.
