E² Empire Essentials

Empire Essentials

Entry-Level Incident Management System
This is this is your next step. Empire Essentials is where you want to be.

NY Responds *Enhanced*

Building on the **NY Responds** capabilities that you already posses, **Empire Essentials (E²)** is the *next step* to managing your own incidents and having internal communications, internal tracking, while still having the benefits of sharing information and requests with the state with a single-click when needed.

Enhanced tools for local Communication, Coordination, & Cooperation

- 10 Concurrent Users
- Create your own Incidents
- NYS Customers Only
- Task & Resource Management, Pre-Config Status Boards, and User Security Permission Management
- Training Video Provided
- Single-click sync for internal/external collaboration

A Perfect Compliment to Your NY Responds Workflow

BCG subject matter experts scoped the must-have capabilities for New York State emergency managers and created the day-to-day All-Hazards package: DLAN **Empire Essentials (E²)**. **E²** is an entry-level Incident Management System (IMS) crafted to augment the capabilities of smaller NYS entities by providing the ability to create your own incidents, track your own missions and tasks, and sync data for internal/external collaboration with a single-click (such as NY Responds).
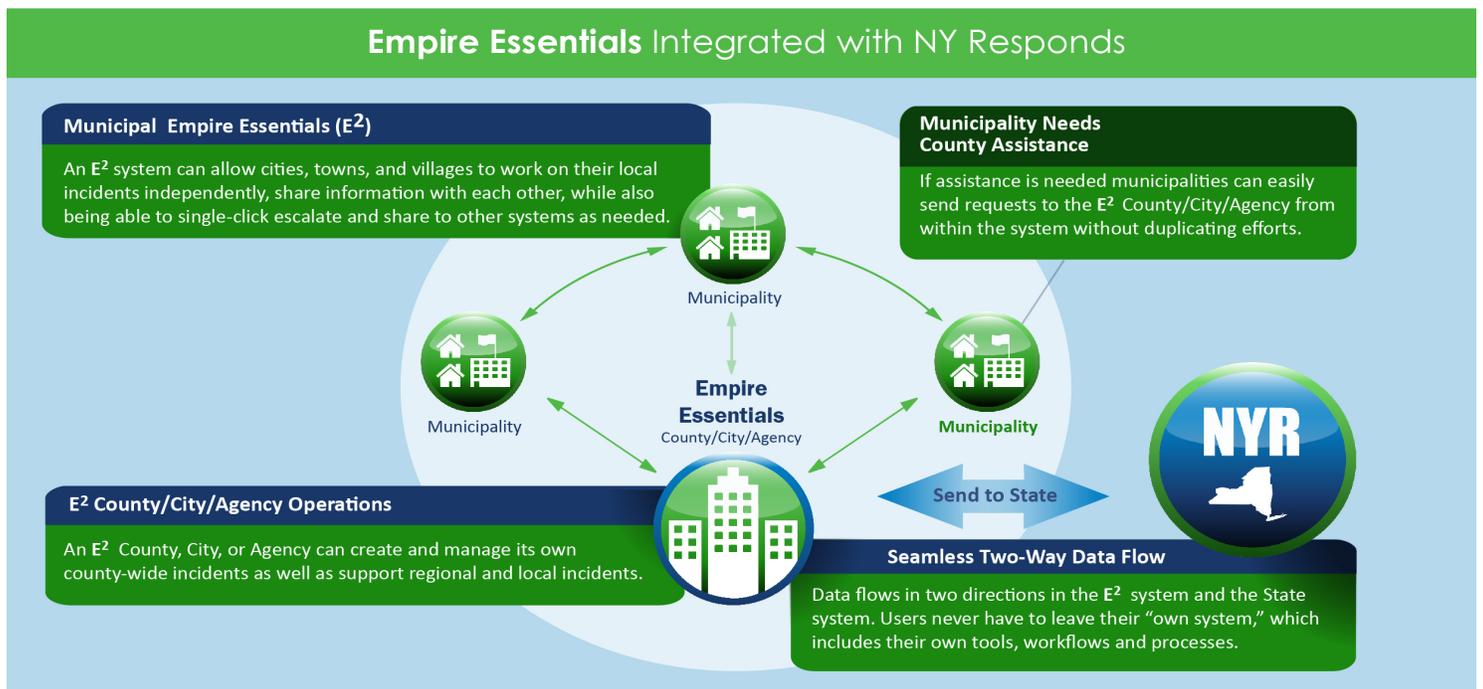

Control Your Own Incidents

You started with NY Responds, and this is the next step in your journey. Do you want to manage your own incidents? Do you want to be able to control your own statuses? Do you want to manage things that the State is not activated for?

E² provides the tools to have more granular control of your operations. Fully upgradeable, you have the option to add even more modules down the road.

Empire Essentials Integrated with NY Responds

Municipal Empire Essentials (E²)

An **E²** system can allow cities, towns, and villages to work on their local incidents independently, share information with each other, while also being able to single-click escalate and share to other systems as needed.

Municipality Needs County Assistance

If assistance is needed municipalities can easily send requests to the **E²** County/City/Agency from within the system without duplicating efforts.

Send to State

E² County/City/Agency Operations

An **E²** County, City, or Agency can create and manage its own county-wide incidents as well as support regional and local incidents.

Seamless Two-Way Data Flow

Data flows in two directions in the **E²** system and the State system. Users never have to leave their "own system," which includes their own tools, workflows and processes.

Empire Essentials will provide you with direct local NYS Support and Subject Matter Experts, greater functionality, enhanced Interoperability, and greater Situational Awareness at an **entry-level cost**, all with easier, **expanded payment options**.

Use your 2025 EMPG or SHSP grant funding!

- **EMPG Emergency Management Performance Grant**

  EMPG assists state, local, tribal and territorial governments in developing their emergency management capabilities and for all-hazards preparedness activities.

- **SHSP The State Homeland Security Program**

  SHSP is a federal homeland security program that provides funds to build and sustain capabilities at the state, local, tribal, and territorial levels.
