

Higher Education

Our Knowledge is Institutional

BCG has been supporting Incident Responses such as Active Shooter Incidents, Exercises, Trainings, Custom Engineering needs, and on-site Emergency Operations Center Staffing since 2004.

- **Campus Safety & Emergencies**
- **Game Day & Mass Gatherings**
- **Daily Operations**
- **Drills & Exercises**
- **Alerting**
- **Curriculum & Instruction**

Campus Safety & Emergencies

Integrating our Incident Management System (IMS) into your daily operations will help keep your team prepared. Scenario-based notification templates and ticketing tools help you alert your population, activate appropriate response plans, and maintain contact with timely notifications throughout the life-cycle of the incident with just the click of a button. Oversee on-and-off campus student population, those studying abroad, and conduct relocation and reunification operations if necessary.

Define the EOC Staffing for this Operational Period:

Staff Positions	Operational Period Staff	Prepared / Approved By
Planning Section Chief	Jayden Jones	
Incident Commander	Michael Ward	Michael Ward
Resources Unit	Ava Thompson	
Communications Unit	Kelly Quin	
Medical Unit Leader	Allen Awad	
Safety Officer	David Katz	

Game Day & Mass Gatherings

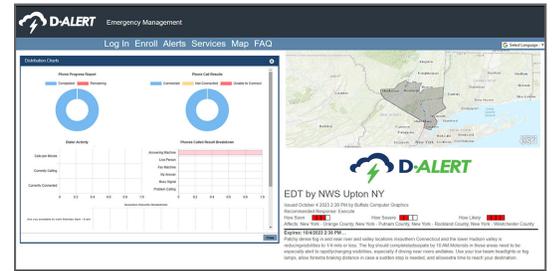

DLAN also includes everything you need to manage special and routine events, such as sports competitions, speakers and VIPs engagements, academic functions and commencements. For example, some of our customers use the DLAN solution to manage and coordinate multi-department operations for all athletic events.

Don't invest in a one-off. Invest in a system that's by your side every day.

Mass Notification & Alerting

Distribute information quickly and easily with a custom mass notification system that's ADA compliant and 100% web-based. Integrate your system directly with DLAN, or work independently using Mass Notification as a standalone product. Perfect for multi-campus and intra-organizational/private messaging.

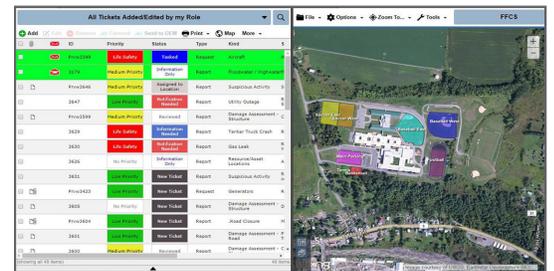

Daily Operations

Our software provides tools for daily operations, such as campus patrol, routine task management, community briefings, facility and HAZMAT management, maintenance, inspections, compliance reporting, move-in, commencement, personnel tracking, and vaccination clinics. DLAN helps executives view tasks progress with customizable reporting tools and color-coded statuses and priorities.

Drills & Exercises

Build and conduct your own exercises & scenarios with your DLAN system. Exercise and evaluate your campus operation center, multiple campus operation centers, or drill specific positions within sections or units of your organization. If desired, BCG personnel can design, deliver, and be present on-site to support everything from small seminars to tabletop and large full-scale exercises.

Plus Curriculum & Instruction

Why not make your DLAN system work double duty and offer students real-life experience with the IMS used by your institution? Provide next-level instruction to the future leaders in the industry by exposing them to cutting edge technology, simulation tools, exercise injects, roles, dashboards, and after action reports.
