Threat Assessment Management

Where are you on your TAM journey?

No matter where you are in the process, BCG can enhance your capabilities. We can provide help with data collection, case management, tracking, dashboards, and robust reporting.

- **Just Starting Out** - we can provide a scalable, A - Z TAM solution.
- **Collecting Data** - streamlined, customizable, flexible, shareable.
- **Case Management** - managing individual reports: sort, prioritize, search & assign.
- **Analysis** - we can provide data visualizations and enhanced reporting.
- **Operationalize Data** - reduce and mitigate threats based on data analysis.

Incident Management, Visualization, & Reporting Experts

BCG's industry-leading expertise in Incident Management perfectly aligns at any-level with your TAM mission and workflow. Our subject matter experts are excellent at gaining an understanding of your process, and building a workflow around your organization's specific needs. BCG also provides **out-of-the box toolkits**, cost-effective and seamlessly integrated within your **existing system**. Flexible toolkits can enhance your existing capabilities, streamlining your TAM workflow, or any combination in between.

Value Proposition

Use existing TAM grant money to get your solution off the ground. Once in place it can be expanded easily (and cost effectively) to build out additional workflows such as public forms, damage assessments, etc. Contact us to see how other organizations use split workflows to allow the TAM solution to be used for other areas of need, without any additional financial burden on your county or municipality.
